03/2021 - Present

Punjab, India

### Bachelor of Technology Rajasthan Technical University, Kota

2016 - 2020

63.2%

## PERSONAL PROJECTS

### Link About Me

- It is a Web Application, which provides all information of a user and also allows them to access their portfolio through QR code or link. Its main purpose is to attach the link to directly redirect the viewer to specific locations.

### Currency Recognizer

- This is a Desktop Application, which helps to recognize the note currency, its value in realtime USD and Rupee, and tell us about some of its facts if it exists.

### RoadSide Garage

- It is a Web Application, which provides information of all the local Garages with their specialization and their availability timing. Client can directly contact with them with the provided information from this Website.

### Supply Labs

- It's a working Project Model which focuses on transport supply chain. Our primary thrust is to prevent the damage of the product during transportation and defining effective packaging character.

## WORK EXPERIENCE

### Software Engineer Fiftyfive Technologies Pvt. Ltd.

07/2020 - Present
